Catalog Numbers: Each entry will be assigned a lot number. That lot number will be paint branded on the back of the sale lot. Branding must be completed prior to the show.

Commission & Charges: ADSBS may charge a sale commission of up to 10% of the full sale price of each animal, including any sheep not sold due to reserve not met or “buy backs”. An additional deduction from the sale settlement will be taken for the Lamb Check-Off and ADSBS transfer fees.

Settlement Checks: ADSBS will be the financial agent for the sale, and settlements with consignors will be mailed within two weeks of the sale.

Futurity Nomination: Fall and January ewe lambs may be nominated for the 2023-2024 ADSBS Futurity Ewe Program for \$35 per ewe. Futurity ewe lambs will be painted branded with an “F” on their withers and an “F” will be next to their lot number on the sale order.

Registration Papers: An original registration certificate for each lot must be turned in at check-in prior to the sale. Pending registrations are not accepted. **If registration papers are not provided at check-in, a fee of \$10.00 per original registration will be deducted from your**

consignor check to reissue the certificate.

Health Papers: Standard interstate health paper is required for every animal. One copy of the health papers for each lot must be given to sale management at check-in. If copies of the health papers for each animal are not provided, a fee of \$10.00 per copy will be deducted from the consignor settlement check. Health papers and any required tests must be completed no more than thirty (30) days prior to the sale. All entries are subject to random vet checks. All sheep, including baby lambs must have a valid USDA scrapie identification tag in their ear. Consignors should come prepared with tags if hauling heavy bred ewes. In the event that newborn lambs do not have scrapie tags, they and their dam will not be eligible to sell.

Testing: While not required by the state of Oklahoma, consignors are highly encouraged to complete the ELISA test for B. Ovis (brucellosis) on rams over 6 months of age. Test results should be within 30 days of the sale and be included on the health paper or provided from an accredited testing lab. Negative test results will be noted on the sale order. Only rams with negative B. Ovis results will be allowed to sell. A positive result suggests epididymitis which can render rams sterile. White Dorper consignors must guarantee their entries to be negative for dermatosparaxis.

DNA Test Information: DNA Test information provided by consignor may be included in the official sale catalog but is not guaranteed by the ADSBS.

Breeding Certificates: Consignors must provide a valid Breeding Certificate for ewes sold as bred or exposed.

Substitutions: Substitutions will be allowed in the interest of improved quality and as long as the ram to ewe ratio per consignor is not exceeded.

Penning: Once checked in at the sale, consignments may not be removed from the sale without permission of the sale manager or their designee. All consignors must use their assigned pens.

Sale Order: The sale order will be determined by class placing. The top 10 sheep in each class will sell in the order they placed in the show with the balance of the sheep in the class sold in a random order. In the event of a split class, the sale order will be in placing order, even then odd from the split class.

Sale Order Designations: All sheep will have their lot number paint branded on their back; baby lambs will be paint-branded with the dam's lot number. Futurity ewe lambs will be painted branded with an "F" on their withers and an "F" will be indicated on the sale order. Any animal sifted will be paint-branded "NS" for "Not Selling" and cannot be sold privately on the premises.

Sifting: Any unsound, inferior or unacceptable entries in the opinion of the judge will be sifted and not allowed to sell in the sale. All decisions by the listed Judges are final.

Shearing Rules: All consignments must be slick-sheared within 30 days of the sale. All consignments must be washed prior to paint-branding.

Prohibited Fitting: Structural manipulation and/or unethical fitting shall be defined as any of the following:

- i. the injection, use, or administration of any drug that is prohibited by Federal, State or Local Law or any drug that is used in a manner prohibited by Federal, State or Local Law;
- ii. the injection or internal or external administration of any product or material — whether

- gas, solid, or liquid — to an animal for the purpose of deception, including concealing, enhancing, or transforming the true conformation, configuration, color, breed or age;
- iii. tissue manipulation, removal, surgical attachment or otherwise to change, conceal, enhance, or
- iv. transform the true conformation or configuration of the animal;
- v. attaching to the hide or legs any foreign objects, including hair and/or wool or substitutes, cloth or fiber for the purpose of deception;
- vi. any other physical or physiological attempt to alter the musculature or weight of an animal by use of injections or ingested material not conducive to the continued health or marketability of the animal or for purposes of deception, and
- vii. Use of irritants including alcohols, sprays, and other irritants

Artificial Coloration Policy: The use of any agents to change skin, hair, or hoof coloring on any animal consigned is prohibited. The ADSBS reserves the right to adopt and implement testing procedures. Violation will lead to disqualification from the sale.

Sifting Committee: The sale manager may appoint a sifting committee to determine the eligibility of animals to compete prior to judging. Animals must be un-blanketed and ready for inspection upon request of the sale manager. The sifting committee will excuse from the sale any animal which, in its judgment, does not meet minimum breed standards. The sale manager may require animals be removed from the sale penning area. The sale manager or their designee(s) will make any final determination about sifting protests.
